

# Honda 919

## Bike Specific Install Notes and Tips

This is an aftermarket product that fits up different than the stock components, therefore, the installer may be required to set up components and to route lines in the "best way possible", which may not always be listed on this "Bike Specific" installation sheet. In any case, the installation must allow the handlebars to reach both steering stops, without pulling taught or kinking any lines, and without damaging any part of the motorcycle

### **Important Installation Considerations**

Great fit up. Lots of adjustability up to 3" above stock and more than 3" below stock

### **Recommended Riser Trim Length**

1. 8.0" Riser Length = No Trimming
